PROFESSIONAL EXPERIENCE

SPRY Therapeutics | AI Product Manager **[Aug'25 – Present]**

Responsibilities	• **Designed and launched an AI native Payments Automation Stack**, defining functional specifications for real time payer validation workflows, integrating LLM based claim scrubbing and intelligent billing rule engines into a fully automated financial pipeline. • **Built an end to end AI Claims Processing pipeline** with automated eligibility checks, CPT code validation, and denial prediction models, translating complex payer rule specifications **into API first service definitions** in collaboration with engineering teams. • **Architected a Denial Management Automation engine using NLP** to classify denial reasons, auto generate payer specific appeal narratives, and intelligently route cases by priority, recovering revenue previously lost in AR aging queues. • **Owned the release management process for finalized payment automation specifications**, coordinating cross functional rollouts across billing, engineering, and operations teams to ensure successful feature launches.
Results	• **Reduced claim denial rates by ~30%** and **cut claims submission TAT by 45%** through AI powered pre submission scrubbing and automated payer rule validation, directly improving cash flow. • **Recovered significant AR revenue** by automating denial appeals, enabling the billing team to **action and resolve cases 3x faster** than the manual baseline. • **Reduced clinician administrative time by 40%** via SPRY Scribe's EMR integrated documentation automation, improving both operational throughput and care quality.

Avanse Financial Services Limited | Senior Product Manager **[Jul'24 – Aug'25]**

Responsibilities	• **Spearheaded the end to end development** of the Customer Portal Web and Mobile App, **defining RESTful API specifications including JSON payload structures**, authentication mechanisms, and error handling frameworks in collaboration with engineering teams. • **Designed UI/UX wireframes in Figma** and conducted usability testing with real customers, **achieving a 30% improvement** in onboarding completion rates. • **Developed an AI powered chatbot using ElasticSearch + NLP, capable of understanding regional languages** to support customers from Tier 3 cities, boosting engagement and accessibility. • **Built an Intelligent Risk Categorization System leveraging behavioral, transactional, and credit data** to dynamically classify users into risk tiers, presenting insights and proposals directly to Risk & Compliance leadership. • **Designed and launched a Document Fraud Detection Platform integrated with OCR + NLP + DigiLocker APIs**, enabling anomaly detection, faster document validation, and reduced fraud exposure.
Results	• **Launched an AI powered chatbot** that helped the customer service team resolve ticket backlogs in seconds, **cutting resolution time by 50%** and improving accessibility for vernacular users. • **Established JIRA workflows, product documentation, and Confluence repositories**, setting up automation rules for sprint planning, release tracking, and roadmap visibility across teams. • **Reduced document processing TAT by 60%** with OCR based data extraction and automated validation, improving LOS efficiency for Operations and Risk teams.

ICICI Bank | Product Manager (Merchant Ecosystem) **[Jun'22 – Jul'24]**

Responsibilities	• **Led end to end automation and analytics** of the Pan India Management Information System (MIS) for the Merchant Ecosystem segment, translating complex multi-source transactional data into stakeholder ready intelligence across business verticals. • **Collaborated with cross functional teams and fintech partners** to co-develop POS hardware and software, running structured workshops, ensuring regulatory compliance, and driving iterative enhancements to the end to end merchant journey. • **Developed a predictive analysis feature** for merchants to foresee future sales trends and transaction volumes, translating data insights into actionable product decisions using SQL based extraction and analytics. • **Proactively resolved live payment and POS issues** by working cross-functionally with tech and operations teams.
Results	• **Partnered with fintech firms** and internal teams to develop hardware and software for in house POS, successfully launched in house POS ecosystem with **150K+** active merchants within the first 9 months. • **Drove adoption of ISO 20022 aligned data models** for merchant payment flows, **enriching transaction data beyond ISO 8583** limits to enable improved reconciliation, regulatory reporting, and cross system interoperability. • **Improved merchant satisfaction (NPS +15)** through faster settlements, intuitive dashboards, and proactive data transparency.

EXTRACURRICULAR ACTIVITIES

- Awarded the **Ace Performer trophy** by Avanse for exceptional product management contributions, driving intuitive product decisions.
- Completed certification courses on **Business and Corporate strategy** offered by the University of Illinois at Urbana-Champaign.
- Awarded the **top performer** certificate in the forage virtual internship programme working for companies like Deloitte, Accenture & BCG.
- Among the **top 1% cohort** of students who gave the Upraised's Associate Product Management (APM) Test.
- Won **the Silver medal** in the National Science Olympiad (NSO) in the year 2013.
- Won the Hitvada Trophy **for securing 2nd Position** in the entire school in the SSC examination.

PROFESSIONAL SKILLS

1. **SQL / Python**
2. **MS Office Suite**
3. **LangChain / LangGraph**
4. **OpenAI Playground**
5. **Power BI**
6. **Postman / API development**
7. **Google Analytics (GA4) / Mixpanel**
8. **Figma**
9. **Claude Code**
10. **Agile / Scrum**
11. **JIRA**
12. **Gen AI / Agentic AI**
